What have been your clients' responses to the proposals?

① Start presenting to display the poll results on this slide.

Learning objectives

By the end of this session, you'll be able to:

1.

Describe the proposed changes to pensions and IHT legislation.

2.

Identify and examine how this will impact particular clients.

3.

Define which clients need to take action in the short/medium terms and the impact this will have on your advice process.

5.52 Inheritance tax: unused pension funds and death benefits – The government will bring unused pension funds and death benefits payable from a pension into a person's estate for inheritance tax purposes **from 6 April 2027**. This will restore the principle that pensions should not be a vehicle for the accumulation of capital sums for the purposes of inheritance, as was the case prior to the 2015 pensions reforms.

IHT on Pensions/Destination 2027

Summary

We welcome views on this technical consultation on the processes required to implement changes to Inheritance Tax rules for pension funds and death benefits.

This consultation closes at
11:59pm on 22 January 2025

Consultation description

As announced at Autumn Budget 2024, from 6 April 2027 most unused pension funds and death benefits will be included within the value of a person's estate for Inheritance Tax purposes and pension scheme administrators will become liable for reporting and paying any Inheritance Tax due on pensions to HMRC.

This is a technical consultation on the processes required to implement these changes for UK-registered pension schemes. It is likely to be of interest to individuals, pension scheme administrators and other pensions professionals, tax and legal practitioners.

After the consultation, the government will publish a response document and carry out a technical consultation on draft legislation for these changes in 2025.

Are pensions still the best vehicle to fund retirement?

Tax relief at highest marginal rate

Tax free growth

Tax free cash

IHT free to spouse

Case Study Pre Retirement – distribution of assets in the event of death prior to retirement

- Stuart age 50
- Pension pot - £1.5m
- Spouse
- Adult child from previous relationship
- Planning to split pension 50%/50%

Case Study Pre Retirement – distribution of assets in the event of death prior to retirement

Pre April 2027

- Prior to budget no IHT considerations both receive same amount - £750k

Post April 2027

- Spouse will receive £750k
- Child assuming nil rate band used will receive
- $£750k - £325k = £425k$
- $£425k * 40\% = £170,000$
- Adult child now receives £580k

RIAAT – withdrawal strategies

Withdrawal strategy

3.24 Various withdrawal strategies may be employed by a firm to assist a client to achieve their objectives for their retirement savings. Below we list some examples of common withdrawal strategies we have seen used in relation to flexible benefits. This list is not exhaustive and a firm may use multiple withdrawal strategies.

Within the RIAAT there are seven identified withdrawal strategies

(a) A “sustainable withdrawal rate”

(b) A “natural income” or “natural yield” strategy

(c) A “multiple pots” strategy

(d) “Bridging to other income”

(e) A “withdrawal minimisation”

(f) A “fixed/short-term annuities”

(g) An “ad hoc withdrawals only”

Which option do you think most clients will choose?

① Start presenting to display the poll results on this slide.

Head or heart?

Head or heart?

- IQ v EQ
- Is it the number or the emotional effect?
- What is the client's driver?
- Is it looking after themselves and their retirement needs (don't care what happens I won't be here).
- Or I want to ensure my money goes exactly where I want it to, even if that means more tax.
- Or I just want to pay the least amount of tax.

Planning with pensions

Draw more income than I need

Consolidation – make life easier for family – beware of possible de-minimis

Gifting

Review nomination forms – discretion to direction if allowed

Pension and ISA contributions for grandchildren

Review DIS v group life/relevant life policies

Using exemptions and NEOOI

Liquidity of assets – SIPP/SSAS with property

Normal Expenditure Out of Income

5 things you need to know

Drawdown Income, PCLS and UFPLS are income

RETIREMENT

PRIORITY

- Identify red money – segmentation
- Clients post 75 TFC
- Client who may need expression of wish changed

GENERAL BOARDING

- Clients looking to gift money
- Clients topping up red money
- Clients with Red money but feel “they might need it”

SPECIAL ASSISTANCE

- Consolidation to make life easier for family
- Beware of possible de-minimis
- Annuities – rules still unclear

slido

Please download and install the Slido app on all computers you use

What will you be advising clients to do with their red money?

① Start presenting to display the poll results on this slide.

Learning outcomes

By the end of this session, you'll be able to:

1.

Describe the proposed changes to pensions and IHT legislation.

2.

Identify and examine how this will impact particular clients.

3.

Define which clients need to take action in the short/medium terms and the impact this will have on your advice process.

Red money – destination unknown

EGRs – expectation and reality

25/11/2013	6.20%	6.03%	2.17%
25/11/2014	6.00%	6.13%	2.58%

Figures are for PruFund Growth Fund held within PruFund Investment Plan. The PruFund figures include any additional investment expenses, but not any fund management, product or advice charges, so the amount an investor would get back would be less than shown here. Some, if not all, of the funds comprising the ABI sector average are net of fund charges. Past performance is not a reliable indicator of future performance. The value of an investment can go down as well as up. Source: Prudential and FE Analytics

Historic maximum withdrawal rate without erosion of capital

Table shows maximum withdrawal rate, as % of initial investment, that can be taken without loss of initial investment at end of time period indicated

	Start 31/12/2014 (10 years)	Start 31/12/2015 (9 years)	Start 31/12/2016 (8 years)	Start 31/12/2017 (7 years)	Start 31/12/2018 (6 years)	Start 31/12/2019 (5 years)
IA Mixed Investment 0-35% Shares Sector	2.3%	2.6%	1.8%	1.4%	2.2%	1.0%
IA Mixed Investment 20-60% Shares Sector	3.7%	4.0%	3.2%	2.6%	4.0%	2.4%
IA Mixed Investment 40-85% Shares Sector	5.4%	5.8%	4.9%	4.1%	6.1%	4.1%
PruFund Cautious Pn Ser A	4.2%	3.9%	4.3%	3.8%	4.1%	4.0%
PruFund Growth Pn Ser A	6.1%	5.6%	5.6%	5.2%	5.1%	5.1%

Figures for PruFund Growth Pension and PruFund Cautious Pension are gross of tax. Figures are over the time period shown to end of December 2024. Initial investment of £100,000 and withdrawals taken at the end of the month. Past performance is not a reliable indicator of future performance. Both PruFund Growth Pension and PruFund Cautious Pension include a representative annual charge of 0.65% and any additional investment expenses, but not any product or advice charges, so the amount an investor would get back would be less than shown here. Some, if not all, of the funds comprising the IA sector averages are net of fund charges. This example represents a typical situation. It is not related to any particular individual and does not recommend that course of action. Source: FE Analytic.
